between scientists or scientific institutions.

(9) Whether in the case of wildlife or plants listed in Appendix II, they are the subject of a large volume of trade and are not necessarily threatened with extinction.

(e) *Permit or certificate conditions.* In addition to the general criteria set forth in part 13 of this subchapter, permits or certificates issued under this section shall be subject to the following special conditions:

(1) Any permit must be presented to a Service agent at a designated port of entry upon importation into the United States or prior to exportation or re-exportation from the United States;

(2) Where appropriate and feasible, the Service may require that an identifying mark be affixed upon any wildlife or plant;

(3) In the case of wildlife or plants that are herbarium specimens, other preserved, dried or embedded museum specimens, or live plant material to be imported, exported or re-exported as a non-commercial loan, donation or exchange between scientists or scientific institutions, the names and addresses of the consignor and consignee must be on each package or container. The letters "CITES" (acronym for the Convention), a description such as "herbarium specimens," and the code letters assigned by the Service to the scientist or scientific institution, must be entered on the Customs declaration form affixed to each package or container.

(f) *Duration of permits or certificates.* The duration of permits or certificates issued under this section shall be designated on the face of the permit or certificate, but in no case will export permits be valid for longer than six months.

(g) *Information collection requirements.* The Office of Management and Budget approved the information collection requirements contained in this part 23 under 44 U.S.C. 3507 and assigned OMB Control Number 1018-0093. The Service may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number. We are collecting this information to

provide information necessary to evaluate permit applications. We will use this information to review permit applications and make decisions, according to criteria established in various Federal wildlife conservation statutes and regulations, on the issuance, suspension, revocation, or denial of permits. You must respond to obtain or retain a permit. We estimate the public reporting burden for these reporting requirements to vary from 20 minutes to 2 hours per response, with an average of 1 hour per response, including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the forms. Direct comments regarding the burden estimate or any other aspect of these reporting requirements to the Service Information Collection Control Officer, MS-222 ARLSQ, U.S. Fish and Wildlife Service, Washington, DC 20240, or the Office of Management and Budget, Paperwork Reduction Project (1018-0093), Washington, DC 20603.

Subpart C—Appendices I, II and III to the Convention on International Trade in Endangered Species of Wild Fauna and Flora**§ 23.21 Criteria for listing species. [Reserved]****§ 23.22 Procedures for amending the appendices. [Reserved]****§ 23.23 Species listed in Appendices I, II, and III.**

(a) The list in this section includes species of wildlife and plants placed in Appendix I, II or III in accordance with the provisions of Articles XV and XVI of the Convention.

The list of species is organized as follows:

| Major group | Subgroups |
|------------------|--------------------------------|
| Mammals | Orders, in taxonomic sequence. |
| Birds | Orders, in taxonomic sequence. |
| Reptiles | Orders, in taxonomic sequence. |
| Amphibians | Orders, in taxonomic sequence. |
| Fishes | Orders, in taxonomic sequence. |
| Molluscs | Classes. |
| Arthropods | Classes. |

§ 23.23

| Major group | Subgroups |
|--------------|-------------------------------------|
| Plants | Families, in alphabetical sequence. |

Within each Subgroup, lower taxonomic units (mainly genera, but sometimes families or subfamilies) are listed in alphabetical sequence. Within genera, the scientific names of the species are listed in alphabetical sequence. The scientific name takes precedence over the common name in determining if a species is listed.

(b) The appendix column of the list includes the annotation "pe" (=possibly extinct) for certain species. It also contains the names of Parties including species in Appendix III.

(c) For purposes of issuing United States certificates of exemption under Article VII(3), the date when the Convention applies to a species is the date when the inclusion of that species in the appendices enters into force under the terms of Article XV or XVI of the Convention. The date of first listing is retained if a species is transferred from one appendix to another or if a listed species is subsequently included with other species in the listing of a taxon above the species level. Such species are shown separately in this publication of the appendices. The date of a subsequent listing is used only if a species is entirely deleted from the appendices and is subsequently reincluded after an intervening period of time.

(d) Unless specified otherwise, all living or dead animals and plants in Appendix I, II or III, and all their readily recognizable parts and derivatives, are subject to the regulations of this Part. Excluded are specified parts or derivatives of particular Appendix III animal species and Appendix II and Appendix III plant species as indicated in the listings of those taxa in subsection (f) below; furthermore, the following spec-

ified parts or derivatives of certain plants are categorically excluded or exempted:

(1) For Appendix II and Appendix III plants and artificially propagated hybrids of Appendix I plants: Seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers; and

(2) For Appendix II and Appendix III plants: Seeds, spores, and pollen (including pollinia); and

(3) For artificially propagated hybrids of Appendix I plants: (i) seeds and pollen (including pollinia) and (ii) cut flowers; and:

(4) For *Panax quinquefolius* (in Araliaceae), parts and derivatives other than roots and their readily recognizable parts.

(5) For artificially propagated or naturalized Appendix II Cactaceae species: (i) fruits and their parts and derivatives; (ii) for *Opuntia* subgenus *Opuntia* species, separate stem joints (pads) and their parts and derivatives.

(6) For Orchidaceae species: (i) in Appendix I, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers; (ii) in Appendix II, if artificially propagated: (A) cut flowers, and (B) for *Vanilla* species, fruits and their parts and derivatives.

(e) The list of species set out in subsection (f) is informational and not regulatory in nature. It is solely intended as a convenience to the public. The official list of species included in Appendices I, II, and III is the one maintained by the CITES Secretariat based on the decisions of the Parties to the Convention.

(f) The list of species in the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora is provided below:
